Kyler Cao

College Station, TX | (832) 966-4150 | kylercao18@gmail.com | linkedin.com/in/kylercao | github.com/kyler505 | kylercao.com

Education

Texas A&M University College Station, TX

Bachelor of Science in Computer Science, Minor in Business *Aug. 2023 - May 2027*

- **GPA: 3.59/4.00** | **Relevant Coursework:** Data Structures & Algorithms, Computer Systems, Database Systems, Software Engineering, Machine Learning

Technical Skills

Languages: Python, TypeScript/JavaScript, Java, C++, C#, Go, SQL, COBOL, HTML/CSS
Frameworks: React, Next.js, .NET, Flask, FastAPI, Node.js, Tailwind CSS, LangGraph
Tools & Platforms: Git, Docker, AWS, Linux, CI/CD, PostgreSQL, MySQL, Redis, TestArchitect
Libraries: pandas, NumPy, scikit-learn, PyTorch, XGBoost, Matplotlib, pgvector

Experience

Product & Engineering Intern May 2026 - Aug. 2026

Global Shop Solutions *The Woodlands, TX*

- Built an **AI-assisted testing and triage workflow** for **COBOL-to-C# modernization** that aggregates automated test logs, screenshots, recordings, and trace data to classify failures and generate diagnostic reports
- Built internal **React, .NET, and MSBuild** tooling that lets engineers queue **COBOL** project builds through a shared legacy compiler workflow, including batch compile support
- Built automated regression-comparison workflows that run paired **COBOL** and **C#** test scenarios, surface behavioral differences, and guide remediation for conversion issues

Internal Tools Developer Oct. 2025 - Present

Texas A&M TechHub *College Station, TX*

- Built a full-stack delivery management system with **Flask, React, and MySQL** that processes **150+ monthly orders** and maintains auditable order histories
- Developed **8+ internal tools** for inventory automation, documentation, and asset lifecycle tracking across **1,000+ campus devices**
- Deployed **1,000+** university devices, cut average imaging time by **15%**, and resolved **200+** faculty and staff support cases

Teaching Assistant Aug. 2024 - May 2025

Texas A&M University *College Station, TX*

- Taught foundational **Python** to **120+ students** through labs, office hours, and weekly problem-solving reviews
- Evaluated **400+ assignments and exams** with a **24-hour turnaround**, providing targeted feedback and creating exam-review materials

Projects

CodeHawk | *Go, Python, LangGraph, Redis Streams, pgvector* | Personal Project June 2026 - Present

- Building a tiered LLM code-review system with a **Go API** for webhook ingestion, diff parsing, and PR posting, plus a **Python/LangGraph worker** for chunk-level model routing
- Developing sandboxed maintenance workflows for dependency updates, dead-code cleanup, and test-gap detection, with self-critique and feedback stages to suppress weak suggestions

Project SHADE | *Python, PyTorch, NumPy, pandas* | Research Project Sep. 2025 - Dec. 2025

- Developed the **LSTM component** of a heat-wave risk model integrating SEIR simulations with **10+ years** of temperature data
- Built a pipeline for **500K+ records** with temporal-lag and rolling-window features, automated dataset splits, and hyperparameter tuning that reached **87% validation accuracy**

FlightPath | *Flask, REST APIs, SQL, pandas* | TAMUHack Jan. 2025

- Built a personalized flight-search engine that ranked American Airlines mock itineraries using traveler preferences, prices, schedules, and routes
- Integrated REST APIs for **50K+ flight records** into a responsive Flask interface with an average response time under **2 seconds**
